Databases

There is more to academic research than Google.
Your tuition helps pay for access to more than 380 databases. Library databases have quality information sources from reputable publishers that are not available for free on the Web.

Using Library databases makes your research time efficient and targeted. For help, IM or call the reference desk or make a RAP appointment.

Many library databases allow you to email full-text articles and to export your citation in the format you need (MLA, APA etc.)
