

Large Format Print Request

Guidelines for submitting a file to be printed:

Please name your file something unique such as john_doe.tiff and not picture.tiff

Please submit your file in .tiff file format, created in RGB 16 bit color at 300 ppi for best results. While CMYK will work, the printer we use is RGB, so you will get the best color reproduction.

Please make sure the image you want printed is sized correctly for the paper size you select.

When sizing your image, make it slightly smaller than the paper size selected to allow for borders.
